

Caring MR Suite[®] Survey Results

- The Caring Suite Control System allows you to survey your Patients with the system iPad[®]
- You have the option to include Pre-Scan questions and Post-Scan questions
- You can change the survey questions at any time
- Patients and caregivers can skip the entire survey or specific questions within the survey
- Survey results are stored until you download them for analysis
- Patients do not answer all questions so sample sizes are variable

Survey Results, Post Scan Question 1

Did the MRI scan room environment help make you feel comfortable?

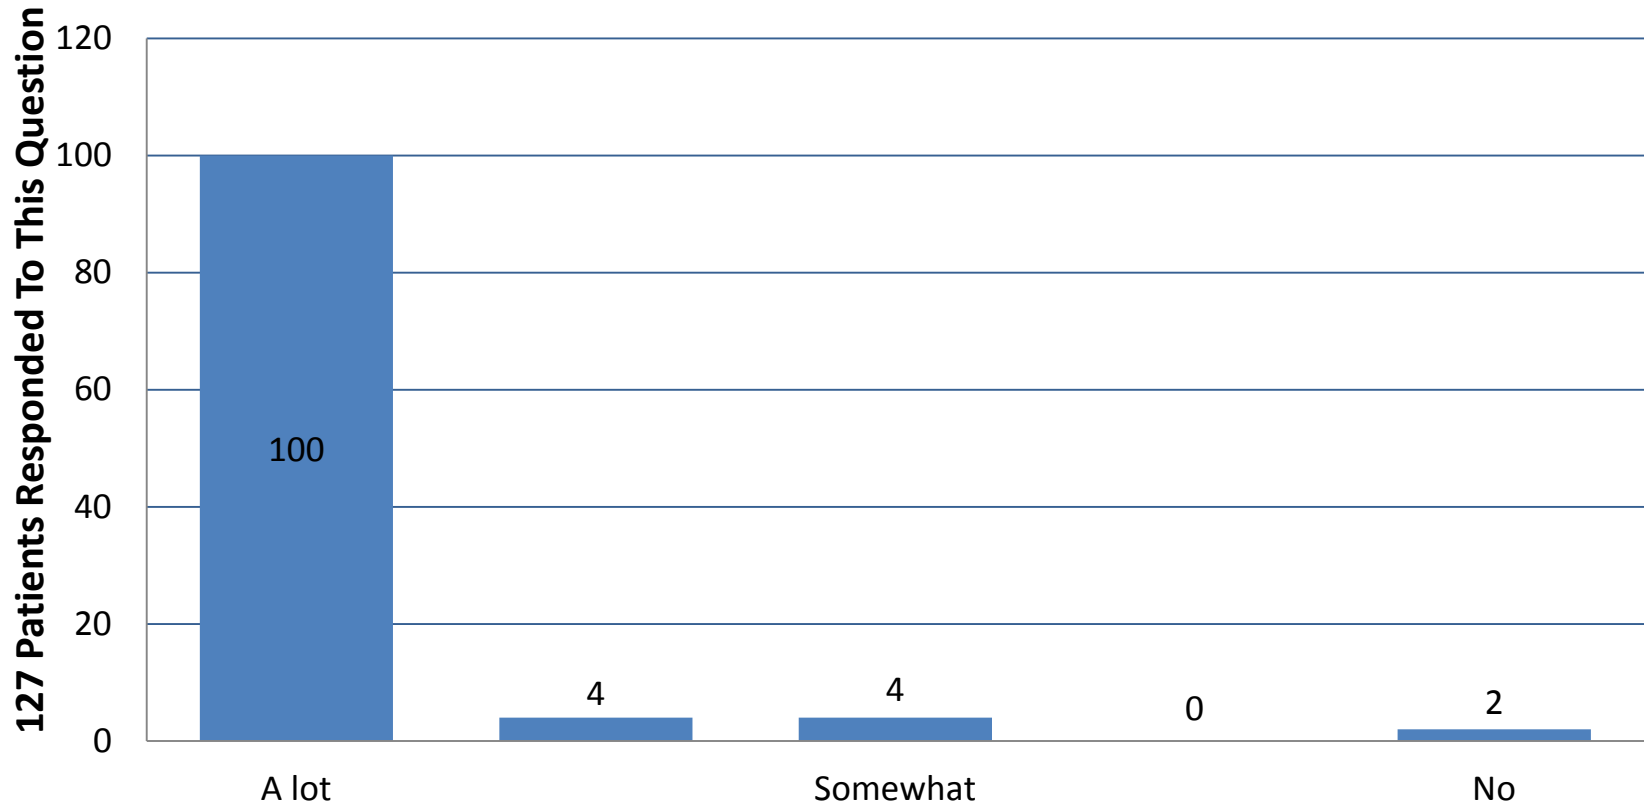

Answer scale of 1 to 5. 5 = A Lot, 3 = Somewhat, and 1 = No.

The next slide removes 17 respondents who reported feeling “Calm/Relaxed” (16) or “Indifferent” (1) on the Pre Scan Survey; therefore, the environment may not have added to their comfort level

Survey Results, Post Scan Q1, Adjusted To Remove 17 Respondents Who Were Calm/Relaxed (16) or Indifferent (1) Prior To Scan

Did the MRI scan room environment help make you feel comfortable?

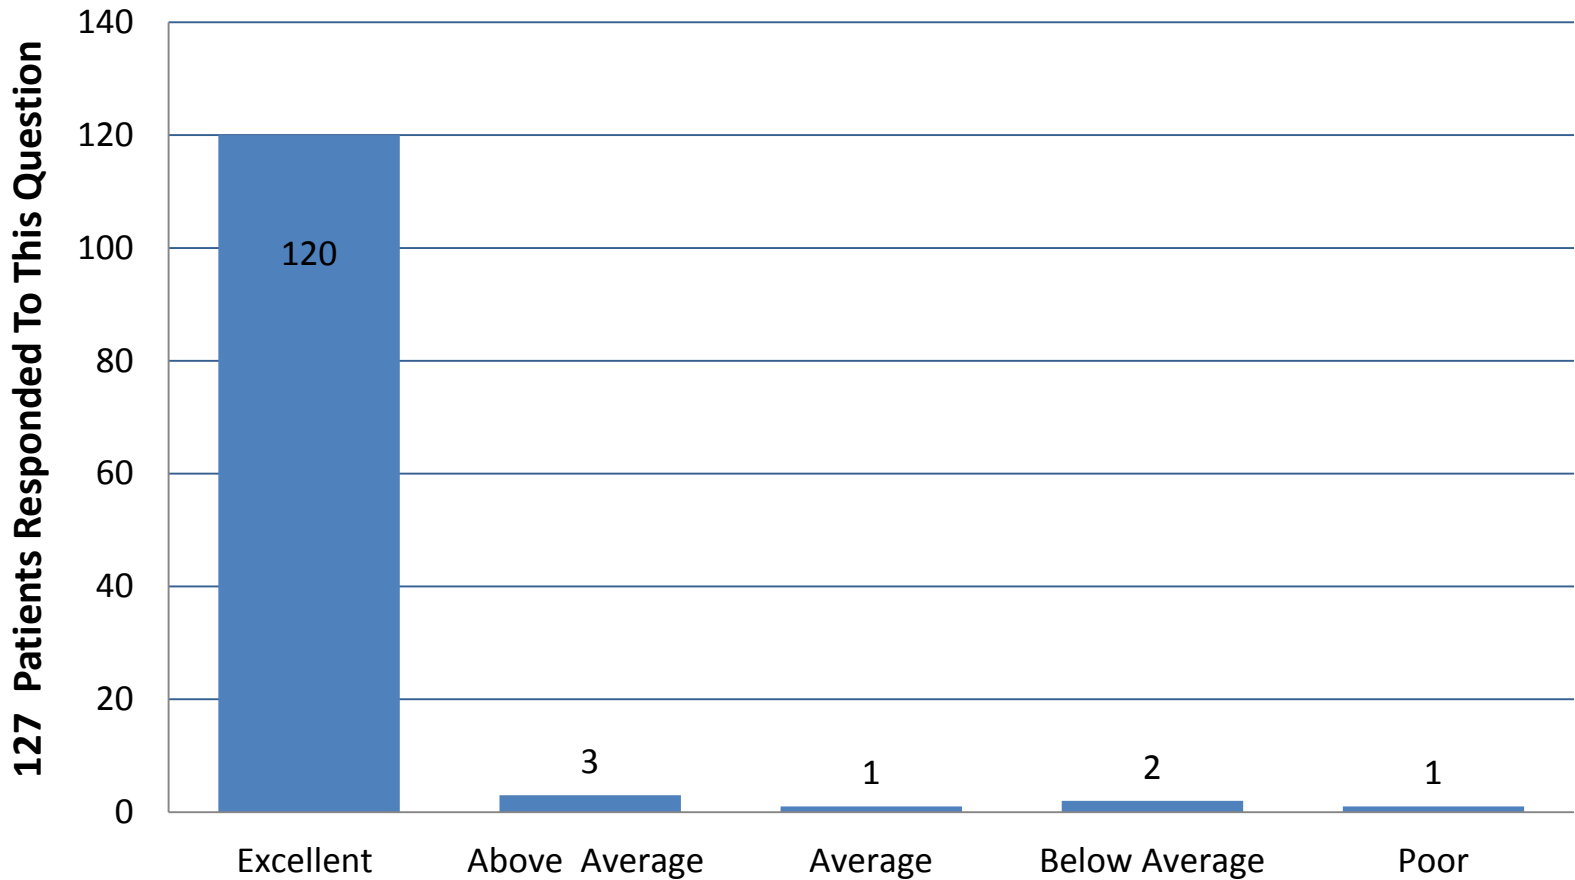

Answer scale of 1 to 5. 5 = A Lot, 3 = Somewhat, and 1 = No.

One respondent who reported “No” also reported that the exam was not performed to physician specifications.

Survey Results, Post Scan Question 2

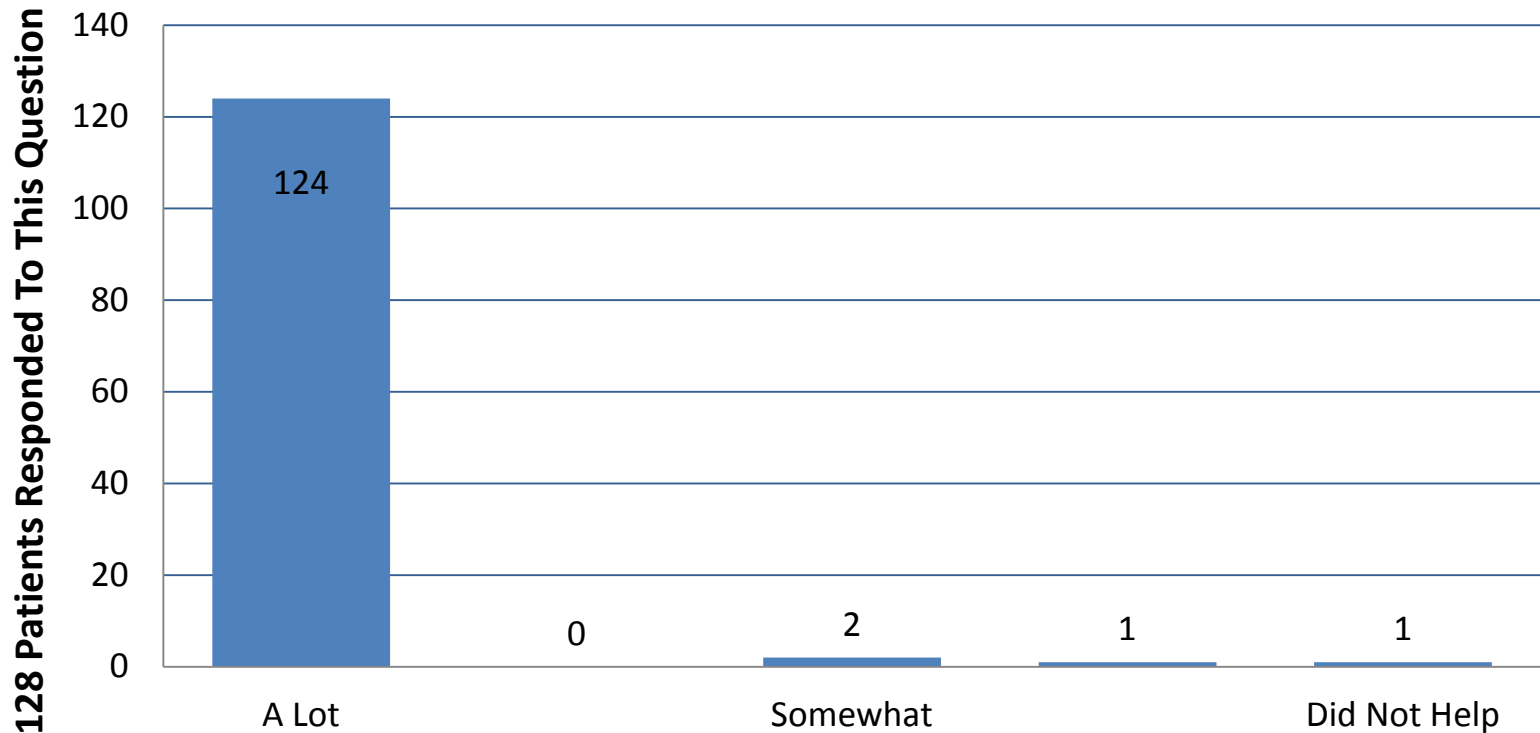

Please rate your experience in the Caring MR Suite

Answer scale of 1 to 5. 5 = Excellent, 3 = Average, and 1 = Poor.

Survey Results, Post Scan Question 3

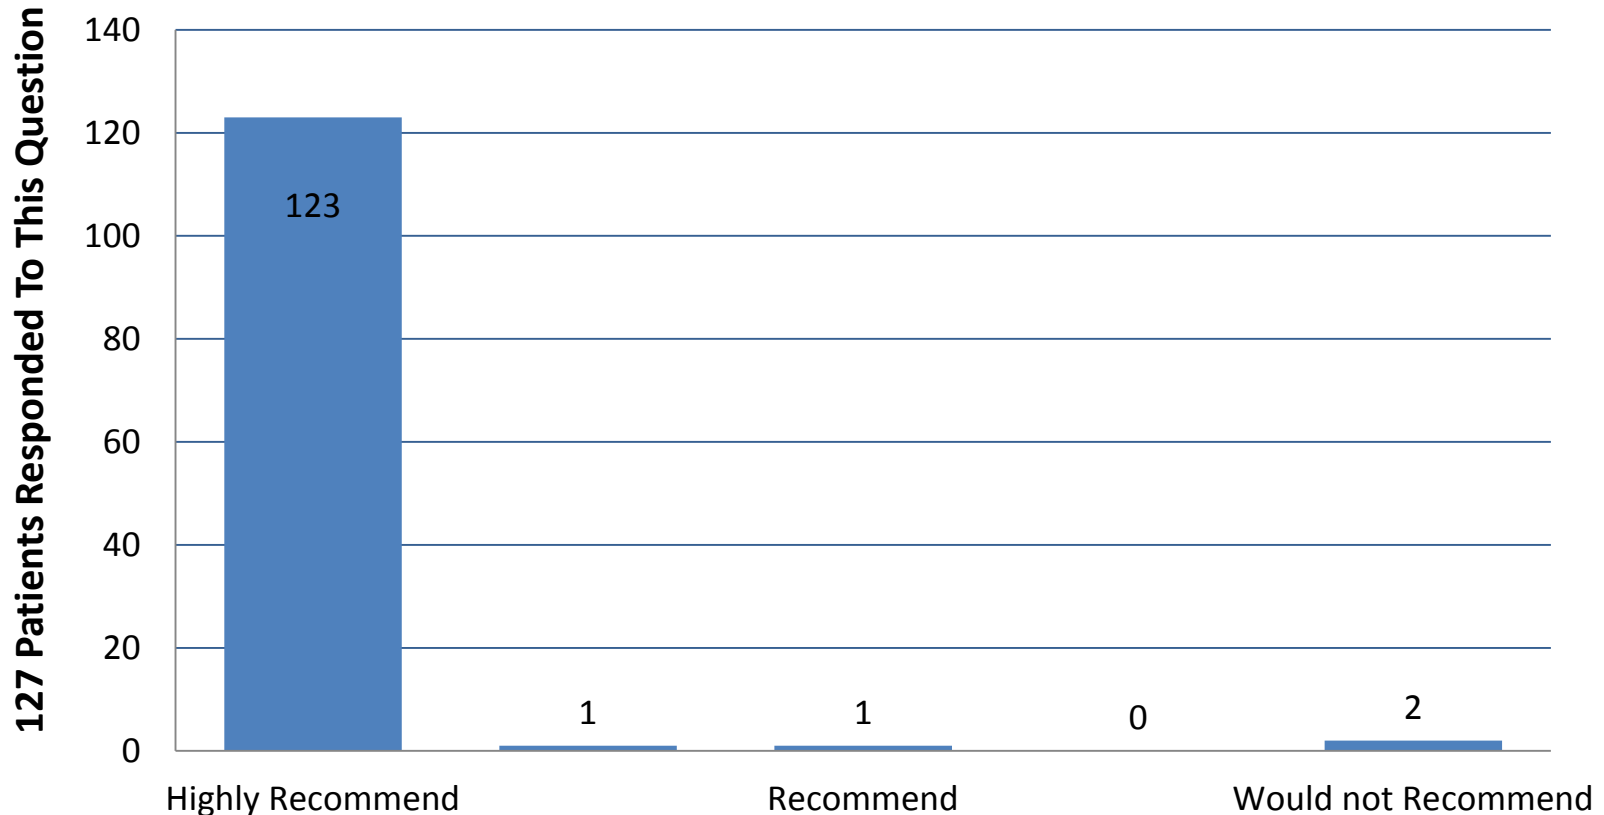

Did the care you received from your Technologist help put you at ease and improve your experience?

Answer scale of 1 to 5. 5 = A Lot, 3 = Somewhat, and 1 = Did Not Help

Survey Results, Post Scan Question 4

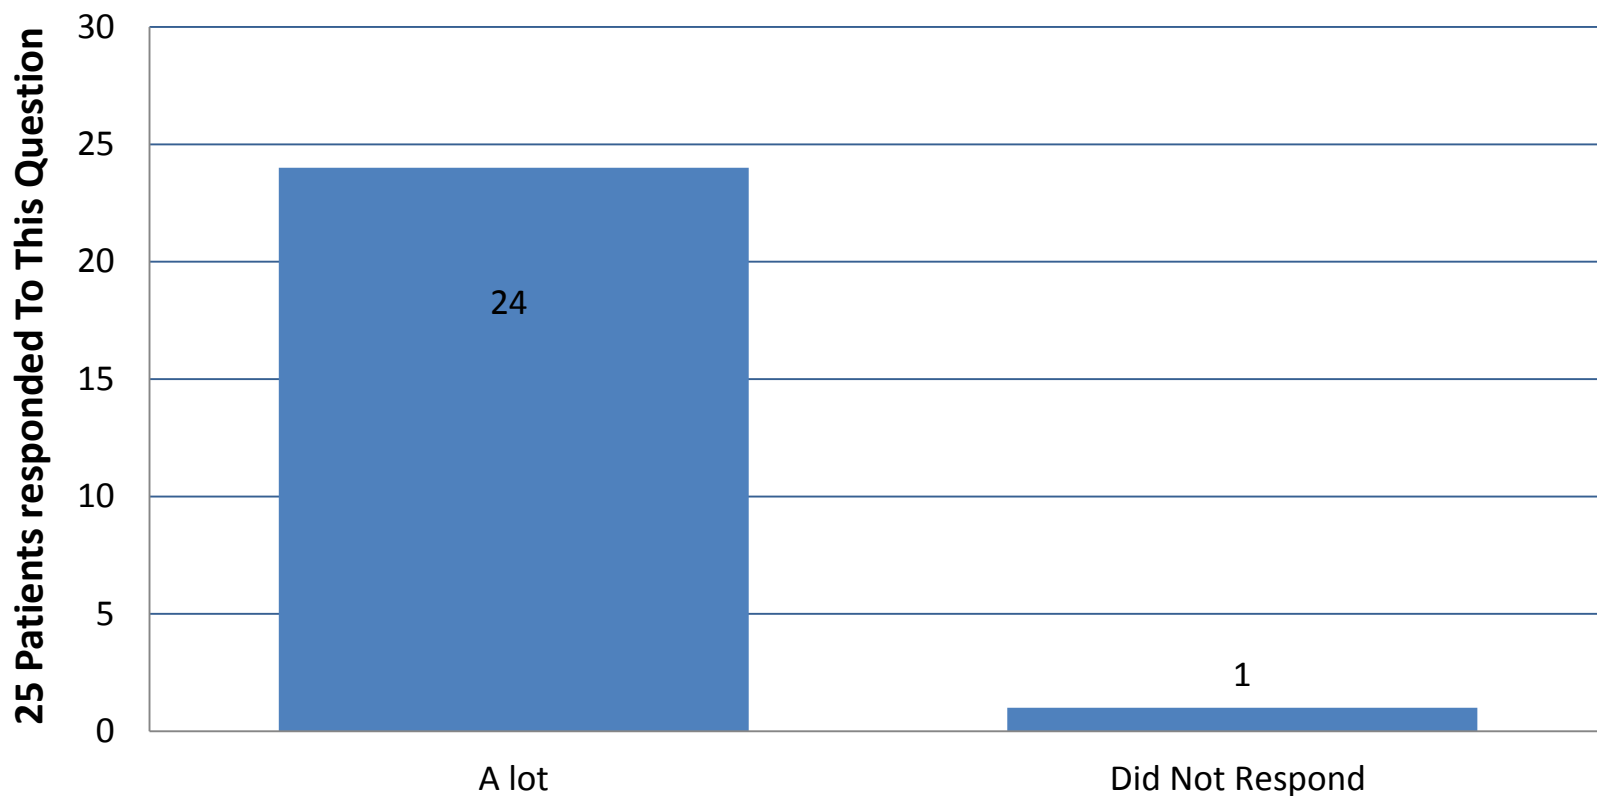

Would you recommend this MRI scan experience to your family and friends?

Answer scale of 1 to 5. 5 = Highly Recommend, and 1 = Would not Recommend

25 Patients reported a high level of anxiety on the Pre Scan Survey and completed the Post Scan Survey. Responses from this group to question 1 are below.

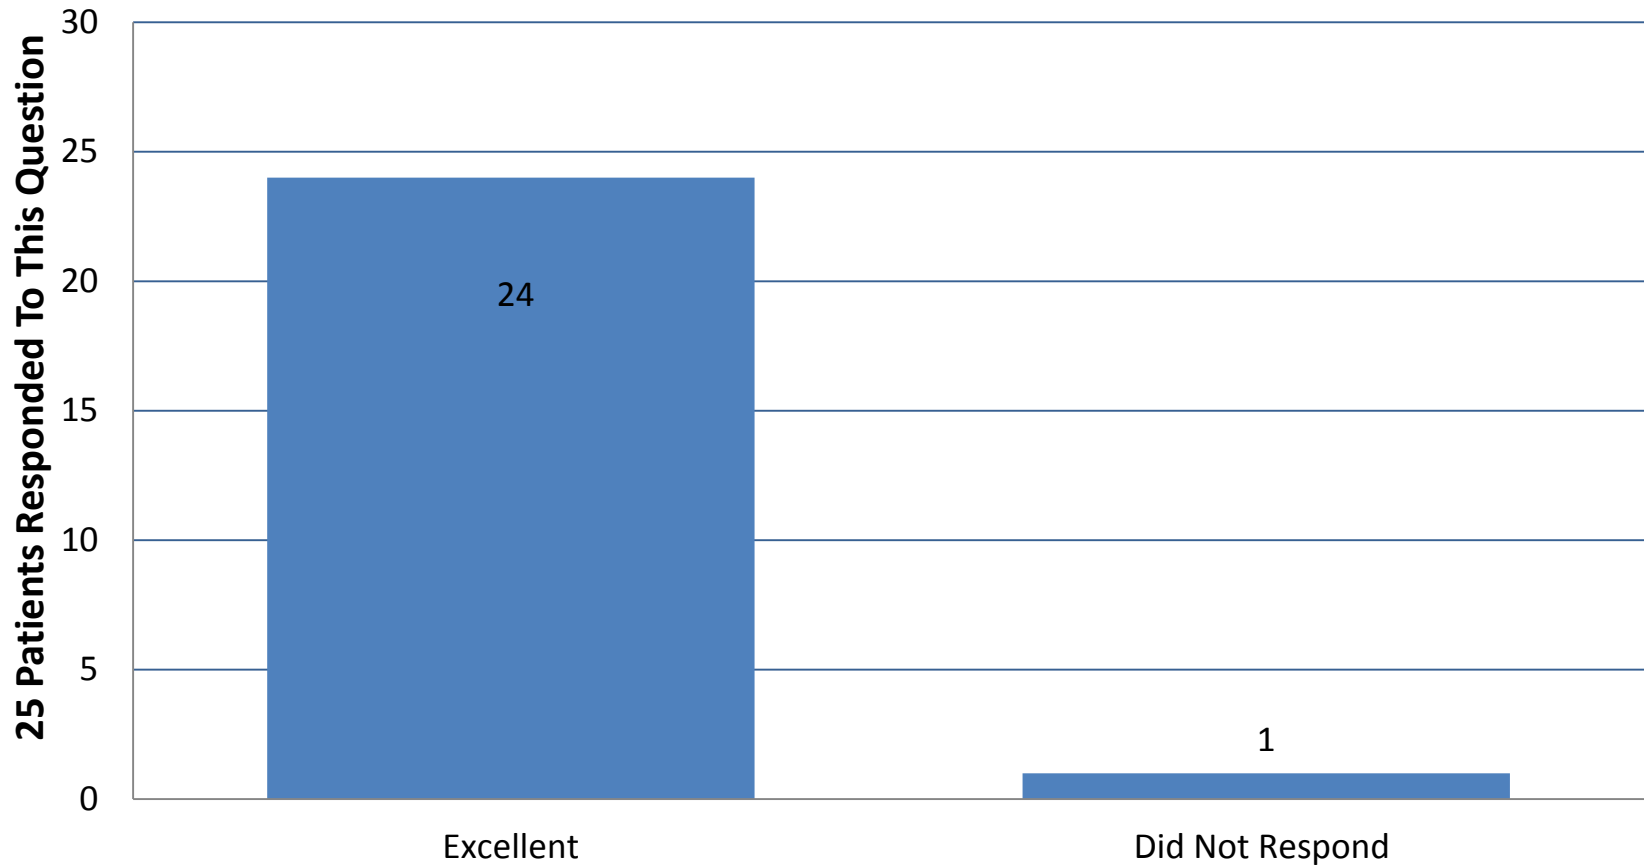

Did the MRI Scan Room environment help make you feel comfortable?

Answer scale of 1 to 5. 5 = A Lot, 3 = Somewhat, and 1 = Did Not Help

25 Patients reported a high level of anxiety on the Pre Scan Survey and completed the Post Scan Survey. Responses from this group to question 2 are below.

- Patients Choose Their Environment With The Tap Of A Touch Pad
- Survey Results Illustrate The Positive And Calming Effects For The Patient

The Caring MR Suite® (CMRS, Patent Pending) is offered by PDC to help improve patient comfort and satisfaction. The CMRS is one of many products offered by PDC to improve patient environments and the healing process.

A hallmark of all PDC patient environments is to give the patient control. In most cases the patient controls the environment with a wireless touch pad.

PDC environments have been installed for MRI, PET MR, CT, SPECT CT and Radiation Therapy. PDC lighting products have been installed in a variety of non-diagnostic and therapeutic spaces.

Lighting options include Circadian Adaptive lighting controls.
